Audit Summary

This report has been prepared for MetaEvent Token on the Binance network. CFGNINJA provides both client-centered and user-centered examination of the smart contracts and their current status when applicable. This report represents the security assessment made to find issues and vulnerabilities on the source code along with the current liquidity and token holder statistics of the protocol.

A comprehensive examination has been performed, utilizing Cross Referencing, Static Analysis, In-House Security Tools, and line-by-line Manual Review.

The auditing process pays special attention to the following considerations:

- Testing the smart contracts against both common and uncommon attack vectors.
- Inspecting liquidity and holders statistics to inform the current status to both users and client when applicable.
- Assessing the codebase to ensure compliance with current best practices and industry standards.
- Verifying contract functions that allow trusted and/or untrusted actors to mint, lock, pause, and transfer assets.

Project Overview

Token Summary

Parameter	Result
Address	0x0b860C7e48F08b464F8D9ce12f0b4cB4d06FBb38
Name	MetaEvent
Token Tracker	MetaEvent (Event)
Decimals	18
Supply	500,000,000,000,000,000,000,000,000
Platform	Binance
compiler	v0.8.15+commit.e14f2714
Contract Name	EVENT
Optimization	Yes with 200 runs
LicenseType	Unlicensed
Language	Solidity
Codebase	https://bscscan.com/address/0x0b860C7e48F08b464F8D9ce12f0b4cB4d06FBb38#code
Payment Tx	0x1f01d304d9c5c2f0dfdbca8d1c2bb3e8b662fe4a8c4c8a8383422a5b20438292

Project Overview

Risk Analysis Summary

Parameter	Result
Buy Tax	15%
Sale Tax	15%
Is honeypot?	Clean
Can edit tax?	Yes
Is anti whale?	No
Is blacklisted?	Yes
Is whitelisted?	No
Holders	Clean
Security Score	98/100
Auditor Score	98/100
Confidence Level	High

The following quick summary has been added to the project overview, however there are more details about the audit and their results please read every details.

Main Contract Assessed Contract Name

Name	Contract	Live
MetaEvent	0x0b860C7e48F08b464F8D9ce12f0b4cB4d06FBb38	Yes

TestNet Contract Assessed Contract Name

Name	Contract	Live
MetaEvent	0xa8dbB0df2Bb9BA5FF4d1783539408F7C51e58115	Yes

Solidity Code Provided

SolID	File Sha-1	FileName
MEvent	4e049fe64b5487e103f674197efd51a79a575297	MEvent.sol
MEvent		
MEvent		

Smart Contract Vulnerability Checks

Vulnerability	Automatic Scan	Manual Scan	Result
Unencrypted Private Data On-Chain	Complete	Complete	Low / No Risk
Code With No Effects	Complete	Complete	Low / No Risk
Message call with hardcoded gas amount	Complete	Complete	Low / No Risk
Hash Collisions With Multiple Variable Length Arguments	Complete	Complete	Low / No Risk
Unexpected Ether balance	Complete	Complete	Low / No Risk
Presence of unused variables	Complete	Complete	Low / No Risk
Right-To-Left-Override control character (U+202E)	Complete	Complete	Low / No Risk
Typographical Error	Complete	Complete	Low / No Risk
DoS With Block Gas Limit	Complete	Complete	Low / No Risk
Arbitrary Jump with Function Type Variable	Complete	Complete	Low / No Risk
Insufficient Gas Griefing	Complete	Complete	Low / No Risk
Incorrect Inheritance Order	Complete	Complete	Low / No Risk
Write to Arbitrary Storage Location	Complete	Complete	Low / No Risk
Requirement Violation	Complete	Complete	Low / No Risk
Missing Protection against Signature Replay Attacks	Complete	Complete	Low / No Risk

Mint Check

The Project Owners of MetaEvent does not have a mint function in the contract, owner cannot mint tokens after initial deploy

..

The Project has a Total Supply of 500,000,000,000,000,000,000,000,000 and cannot mint any more than the Max Supply.

.

Mint Notes:

Auditor Notes: A Mint Function was not found during the code review

Project Owner Notes:

Owner can't mint new coins

Fees Check

The Project Owners of MetaEvent does not have the ability to set fees higher than 25% .

Team May have fees defined, however they dont have the ability to set those fees higher than 25%.

Tax Fee Notes:

Auditor Notes: Tax Recommendation to Project team was to limit it to 25%, the project team accepted this feedback and implemented the changes.

Project Owner Notes: .

Fees can be changed up to a maximum of 25%

MaxTx Check

The Project Owners of MetaEvent can set max tx amount.

The ability to set MaxTx can be used as bad actor, this can limit the ability of investors to sale their tokens at any given time if is set too low..

We recommend the project to set MaxTx to Total Supply or simiar to avoid swap or transfer from failures

MaxTX Notes:

Auditor Notes: We recommended the team to have a limit in terms of the MaxWallet to avoid investors from being locked out.

Project Owner Notes: Project Owner Implemented the Following. `require(newMaxTxAmount > _tTotal.mul(5).div(10000), 'MaxTxAmount Tow Low')`

Project Has MaxTX

Pause Trade Check

The Project Owners of MetaEvent Owner can pause trading but he can't move tokens
(Owner can't pause trading)

The Team has done a great job to avoid stop trading, and investors has the ability to trade
at any given time without any problems

Pause Trade Notes:

Auditor Notes: test

Project Owner Notes:

Owner can't pause trading

Contract Ownership

The contract ownership of MetaEvent is not currently renounced. The ownership of the contract grants special powers to the protocol creators, making them the sole addresses that can call sensible ownable functions that may alter the state of the protocol.

The current owner is the address `0x000004322a64563c4280e8b6bcbf5ed4b7dbbb08` which can be viewed from:
[HERE](#)

The owner wallet has the power to call the functions displayed on the privileged functions chart below, if the owner wallet is compromised this privileges could be exploited.

We recommend the team to renounce ownership at the right timing if possible, or gradually migrate to a timelock with governing functionalities in respect of transparency and safety considerations.

We recommend the team to use a Multisignature Wallet if contract is not going to be renounced, this will give the ability to the team to have more control over the contract.

Liquidity Ownership

The token does not have liquidity at the moment of the audit, block `20094345`

KYC Information

The Project Owners of MetaEvent has provided KYC Documentation.

KYC Certificated can be found on the Following:
[KYC Data](#)

KYC Information Notes:

Auditor Notes: Asked project owner about KYC or Doxxed

Project Owner Notes: Project Team is Fully Doxxed and their linked in can be found on whitepaper and website.

Mythx Security Summary Checks

ID	Severity	Name	File	location
SWC-100	Pass	Function Default Visibility	MEvent.sol	L: 0 C: 0

SWC-134	Pass	Message call with hardcoded gas amount.	MEvent.sol	L: 0 C: 0
SWC-135	Pass	Code With No Effects (Irrelevant/Dead Code).	MEvent.sol	L: 0 C: 0
SWC-136	Pass	Unencrypted Private Data On-Chain.	MEvent.sol	L: 0 C: 0

We scan the contract for additional security issues using MYTHX and industry standard security scanning tool

Security Check Details Page

SWC Information Notes:

Auditor Notes: No Vulnerabilities were found during the security scan, however we did notice they used an older compiler version instead of latest of 0.8.14. Important to read about the bugs associated with 0.7.6 <https://docs.soliditylang.org/en/v0.7.6/bugs.html#>

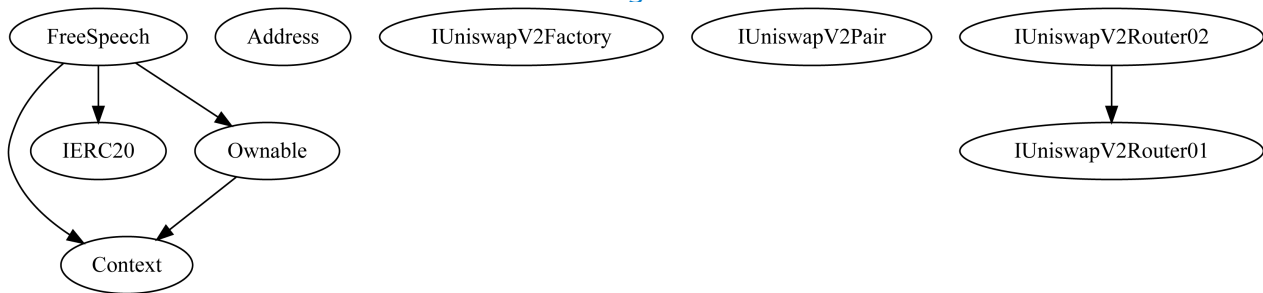

Project Owner Notes:

Call Graph and Inheritance

The contract for MetaEvent has the following call graph structure

The Project has a Total Supply of 500,000,000,000,000,000,000,000 and has the following inheritance

Tokenomics

The contract for MetaEvent has the following tokenomics.

Privileged Functions (onlyOwner)

Function Name	Parameters	Visibility
renounceOwnership	none	public
transferOwnership	account (address)	public
setSwapThreshold	uint256 newSwapThreshold	public
setTaxes	uint256 buy, uint256 sell, uint256 transfer_	public
SetAMM	address AMM, bool Add	public
excludeAccountFromFees	address account, bool exclude	external
setLaunchTimestamp	uint256 timestamp	external
setMinTokens		external
setTimespan		external
setDefaultAutoPayout		external
SetAutoBuyback		external

Auditors Final Verdict

Important Notes To The Users:

- Owner can't charge fees up to 25%.
- Owner can't set max tx amount.
- Owner can't pause trading.
- No high-risk Exploits/Vulnerabilities Were Found in the Source Code.
- Contract has been review it and test it, there no sign of issues within the contract and it came back clean.
- Tokenomics show that only 40% will be available for sale, we recommend customer to sale 65% of their token.

Audit Passed

Social Media Checks

Social Media	URL	Result
Twitter	https://twitter.com/MetaEventBSC	Pass
Instagram	NA	Fail
Website	www.metaevent.me	Pass
Telegram	https://t.me/metaevent_entry_portal	Pass

We recommend to have 3 or more social media sources including a completed working websites.

Social Media Information Notes:

Auditor Notes: undefined

Project Owner Notes: Project Owner state they have plans to launch a discord server.

Disclaimer

CFGNINJA has conducted an independent audit to verify the integrity of and highlight any vulnerabilities or errors, intentional or unintentional, that may be present in the codes that were provided for the scope of this audit. This audit report does not constitute agreement, acceptance or advocacy for the Project that was audited, and users relying on this audit report should not consider this as having any merit for financial advice in any shape, form or nature. The contracts audited do not account for any economic developments that may be pursued by the Project in question, and that the veracity of the findings thus presented in this report relate solely to the proficiency, competence, aptitude and discretion of our independent auditors, who make no guarantees nor assurance that the contracts are completely free of exploits, bugs, vulnerabilities or deprecation of technologies.

All information provided in this report does not constitute financial or investment advice, nor should it be used to signal that any persons reading this report should invest their funds without sufficient individual due diligence regardless of the findings presented in this report. Information is provided 'as is', and CFGNINJA is under no covenant to the completeness, accuracy or solidity of the contracts audited. In no event will CFGNINJA or its partners, employees, agents or parties related to the provision of this audit report be liable to any parties for, or lack thereof, decisions and/or actions with regards to the information provided in this audit report.

The assessment services provided by CFGNINJA is subject to dependencies and under continuing development. You agree that your access and/or use, including but not limited to any services, reports, and materials, will be at your sole risk on an as-is, where-is, and as-available basis. Cryptographic tokens are emergent technologies and carry with them high levels of technical risk and uncertainty. The assessment reports could include false positives, false negatives, and other unpredictable results. The services may access, and depend upon, multiple layers of third-parties.
