# Audit Summary

This report has been prepared for CryptoNFT Galaxy Token on the Binance Smart Chain network. CFGNINJA provides both client-centered and user-centered examination of the smart contracts and their current status when applicable. This report represents the security assessment made to find issues and vulnerabilities on the source code along with the current liquidity and token holder statistics of the protocol.

A comprehensive examination has been performed, utilizing Cross Referencing, Static Analysis, In-House Security Tools, and line-by-line Manual Review.

The auditing process pays special attention to the following considerations:

- Testing the smart contracts against both common and uncommon attack vectors.
- Inspecting liquidity and holders statistics to inform the current status to both users and client when applicable.
- Assessing the codebase to ensure compliance with current best practices and industry standards.
- Verifying contract functions that allow trusted and/or untrusted actors to mint, lock, pause, and transfer assets.

# Mint Check

The Project Owners of CryptoNFT Galaxy does not have a mint function in the contract,  
owner cannot mint tokens after initial deploy

..

The Project has a Total Supply of 40,000,000 and cannot mint any more than the Max Supply.

**Owner can't mint new coins**

# Fees Check

The Project Owners of CryptoNFT Galaxy does not have the ability to set fees higher than 25% .

Team May have fees defined, however they dont have the ability to set those fees higher than 25%.

 Fees can be changed up to a maximum of 25%

# MaxTx Check

The Project Onwers of CryptoNFT Galaxy does not has the ability to set max tx amount

The Team allow any investors to swap, transfer or sale their total amount if needed.

**Project Has No MaxTX**

# Pause Trade Check

The Project Owners of CryptoNFT Galaxy Owner can pause trading but he can't move tokens (Owner can't pause trading)

The Team has done a great job to avoid stop trading, and investors has the ability to trade at any given time without any problems

**Pause Trade Notes:**

**Auditor Notes:** This is a Rebase Token, no pause can be made.

**Project Owner Notes:** Project Owners Ack

# Contract Ownership

The contract ownership of CryptoNFT Galaxy is not currently renounced. The ownership of the contract grants special powers to the protocol creators, making them the sole addresses that can call sensible ownable functions that may alter the state of the protocol.

The current owner is the address 0x207082559c67d75abd6c84e9951292A429fD01b5 which can be viewed from:

[HERE](#)

The owner wallet has the power to call the functions displayed on the privileged functions chart below, if the owner wallet is compromised this privileges could be exploited.

We recommend the team to renounce ownership at the right timing if possible, or gradually migrate to a timelock with governing functionalities in respect of transparency and safety considerations.

We recommend the team to use a Multisignature Wallet if contract is not going to be renounced, this will give the ability to the team to have more control over the contract.

# Liquidity Ownership

The token does not have liquidity at the moment of the audit, block 16801147

# KYC Information

The Project Owners of CryptoNFT Galaxy has provided KYC Documentation.

KYC Certificated can be found on the Following:

[KYC Data](#)

**KYC Information Notes:**

**Auditor Notes:** Auditor asked project owner if there was any plans to KYC.

**Project Owner Notes:** Customer already KYC with Pinksale.
