# Audit Summary

This report has been prepared for Ando (Legendary Collection) NFT Stake on the Binance Smart Chain network. CFGNINJA provides both client-centered and user-centered examination of the smart contracts and their current status when applicable. This report represents the security assessment made to find issues and vulnerabilities on the source code along with the current liquidity and token holder statistics of the protocol.

A comprehensive examination has been performed, utilizing Cross Referencing, Static Analysis, In-House Security Tools, and line-by-line Manual Review.

The auditing process pays special attention to the following considerations:

- Testing the smart contracts against both common and uncommon attack vectors.
- Inspecting liquidity and holders statistics to inform the current status to both users and client when applicable.
- Assessing the codebase to ensure compliance with current best practices and industry standards.
- Verifying contract functions that allow trusted and/or untrusted actors to mint, lock, pause, and transfer assets.

# Project Overview

## Token Summary

Parameter	Result
Address	0x62632aFB752a2De1e89db6F6cDFf418ddca74e17
Name	Ando (Legendary Collection)
Token Tracker	Ando (Legendary Collection) ()
Decimals	0
Supply	0
Platform	Binance Smart Chain
compiler	v0.8.13+commit.abaa5c0e
Contract Name	AndoNFTStakeLegendary
Optimization	Yes with 200 runs
LicenseType	MIT
Language	Solidity
Codebase	<a href="https://bscscan.com/address/0x62632aFB752a2De1e89db6F6cDFf418ddca74e17">https://bscscan.com/ address/0x62632aFB752a2De1e89db6F6cDFf418ddca74e17</a>
Payment Tx	0x3bac61588e003c4591a5077562da3f1edc2d5d5f91d16ab792 8fce15b2c37bb2

## Main Contract Assessed

### Contract Name

Name	Contract	Live
Ando (Legendary Collection)	0x62632aFB752a2De1e89db6F6cDFf418ddca74e17	Yes

## TestNet Contract was Not Assessed

### Solidity Code Provided

SollID	FileNameMD5	FileName
	AndoNFTStakeLegend 89764a224851ed25b89c064f24a9060367e56c2eary	AndoNFTStake Legendary.sol

# Smart Contract Vulnerability Checks

Vulnerability	Automatic Scan	Manual Scan	Result
Unencrypted Private Data On-Chain	Complete	Complete	Low / No Risk
Code With No Effects	Complete	Complete	Low / No Risk
Message call with hardcoded gas amount	Complete	Complete	Low / No Risk
Hash Collisions With Multiple Variable Length Arguments	Complete	Complete	Low / No Risk
Unexpected Ether balance	Complete	Complete	Low / No Risk
Presence of unused variables	Complete	Complete	Low / No Risk
Right-To-Left-Override control character (U+202E)	Complete	Complete	Low / No Risk
Typographical Error	Complete	Complete	Low / No Risk
DoS With Block Gas Limit	Complete	Complete	Low / No Risk
Arbitrary Jump with Function Type Variable	Complete	Complete	Low / No Risk
Insufficient Gas Griefing	Complete	Complete	Low / No Risk
Incorrect Inheritance Order	Complete	Complete	Low / No Risk
Write to Arbitrary Storage Location	Complete	Complete	Low / No Risk
Requirement Violation	Complete	Complete	Low / No Risk
Missing Protection against Signature Replay Attacks	Complete	Complete	Low / No Risk

# Contract Ownership

The contract ownership of Ando (Legendary Collection) is not currently renounced. The ownership of the contract grants special powers to the protocol creators, making them the sole addresses that can call sensible ownable functions that may alter the state of the protocol.

The current owner is the address 0x91df6835179f37fd11bd893a68d9d906e9ac7959  
which can be viewed from:

[HERE](#)

The owner wallet has the power to call the functions displayed on the privileged functions chart below, if the owner wallet is compromised this privileges could be exploited.

We recommend the team to renounce ownership at the right timing if possible, or gradually migrate to a timelock with governing functionalities in respect of transparency and safety considerations.

We recommend the team to use a Multisignature Wallet if contract is not going to be renounced, this will give the ability to the team to have more control over the contract.

# KYC Information

The Project Owners of Ando (Legendary Collection) has provided KYC Documentation.

KYC Certificated can be found on the Following:

[KYC Data](#)

KYC Information Notes:

**Auditor Notes:** Team is doxxed.

**Project Owner Notes:** .

# Mythx Security Summary Checks

SWC-134	Pass	Message call with hardcoded gas amount.	AndoNFTStakeLegendary.sol	L: 0 C: 0
SWC-135	Pass	Code With No Effects (Irrelevant/Dead Code).	AndoNFTStakeLegendary.sol	L: 0 C: 0
SWC-136	Pass	Unencrypted Private Data On-Chain.	AndoNFTStakeLegendary.sol	L: 0 C: 0

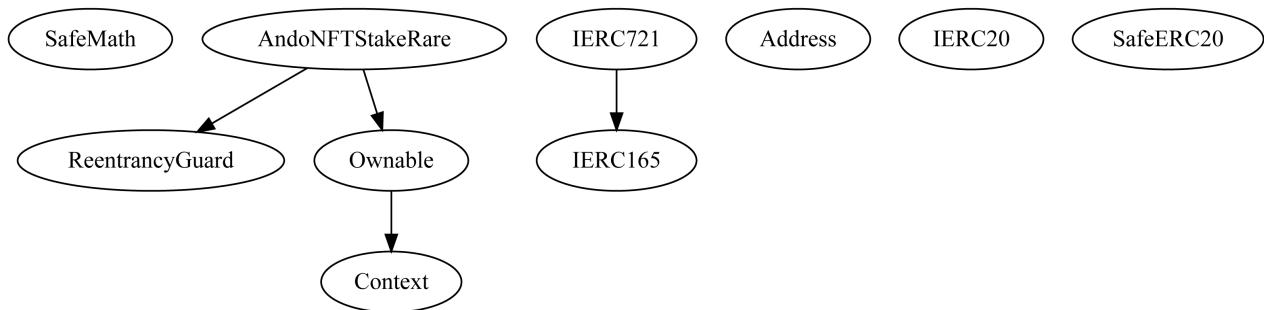

We scan the contract for additional security issues using MYTHX and industry standard security scanning tool

# Call Graph and Inheritance

The contract for Ando (Legendary Collection) has the following call graph structure

The Project has a Total Supply of 0 and has the following inheritance

# Privileged Functions (onlyOwner)

Function Name	Parameters	Visibility
renounceOwnership	none	public
transferOwnership	address newOwner	public
setRewardsPerHour		public
setNftCollection	address nftcollection	public
setRewardsToken	address rewardtoken	public
setTeamAddress	address teamwallet	public
addRewardTreasure		public
recoverTreasure		public
recoverETHfromContract		public
recoverRewardTokensFromContract		public
recoverRewardTokensFromContract		public
setApprovedTokenid		public

## Important Notes To The Users:

- Ando Team is KYC with Pinksale.
- Contract did not show any issues on their code, or any concerns of hidden information or functions.
- We tested the dapp on a extensively and did not encounter any issues.
- No high-risk Exploits/Vulnerabilities Were Found in the Source Code.

## Audit Passed

# Social Media Checks

Social Media	URL	Result
Twitter	<a href="https://twitter.com/andotoken">https://twitter.com/andotoken</a>	Pass
Instagram	<a href="https://www.instagram.com/andotoken/">https://www.instagram.com/andotoken/</a>	Pass
Website	<a href="https://www.andotoken.com/">https://www.andotoken.com/</a>	Pass
Telegram	<a href="https://t.me/andotoken">https://t.me/andotoken</a>	Pass

We recommend to have 3 or more social media sources including a completed working websites.

# Disclaimer

CFGNINJA has conducted an independent audit to verify the integrity of and highlight any vulnerabilities or errors, intentional or unintentional, that may be present in the codes that were provided for the scope of this audit. This audit report does not constitute agreement, acceptance or advocacy for the Project that was audited, and users relying on this audit report should not consider this as having any merit for financial advice in any shape, form or nature. The contracts audited do not account for any economic developments that may be pursued by the Project in question, and that the veracity of the findings thus presented in this report relate solely to the proficiency, competence, aptitude and discretion of our independent auditors, who make no guarantees nor assurance that the contracts are completely free of exploits, bugs, vulnerabilities or depreciation of technologies.

All information provided in this report does not constitute financial or investment advice, nor should it be used to signal that any persons reading this report should invest their funds without sufficient individual due diligence regardless of the findings presented in this report. Information is provided 'as is', and CFGNINJA is under no covenant to the completeness, accuracy or solidity of the contracts audited. In no event will CFGNINJA or its partners, employees, agents or parties related to the provision of this audit report be liable to any parties for, or lack thereof, decisions and/or actions with regards to the information provided in this audit report.

The assessment services provided by CFGNINJA is subject to dependencies and under continuing development. You agree that your access and/or use, including but not limited to any services, reports, and materials, will be at your sole risk on an as-is, where-is, and as-available basis. Cryptographic tokens are emergent technologies and carry with them high levels of technical risk and uncertainty. The assessment reports could include false positives, false negatives, and other unpredictable results. The services may access, and depend upon, multiple layers of third-parties.
